

IM700 STEREO UHF PLL IN-EAR MONITOR SYSTEM

Features IM700T ...Transmitter

- Elegant multi-function LCD panel
- Frequency Range : 720 - 865MHz
- EIA standard half rack metal housing with rack ears
- UHF- band PLL synthesized design.
- XLR combo connector for balanced and unbalanced inputs
- Frequency agility over a 25MHz bandwidth, with preprogrammed frequencies available
- Dynamic expander circuitry delivers S/N ratio greater than 90dB
- Built-in limiter circuitry eliminates distortion under excessive input levels & front panel monitoring headphone jack

Features IM700R... Receiver

- UHF-band PLL synthesized design
- Dual-antenna true diversity reception eliminating signal dropout and enhancing RF stability
- Dynamic expander circuitry delivers S/N ration greater than 90dB
- Stereo or mono audio output selectable with the touch of single switch & Signal indicators
- Frequency agility over a 24MHz bandwidth, with preprogrammed frequencies available with the touch of a single button
- Highly efficient power consumption circuitry
- Ensures long operating hours from two AA batteries
- Dual unbreakable soft antennas
