

Rock Speaker

An addition to the outdoor series. Soundstone speakers camouflage themselves perfectly into any landscape and provide deep and rich sound for those who prefer to keep their settings in harmony with the natural environment.

Acoustical engineering should enhance your lifestyle – while forging perfect harmony with your environment. You may have decided to banish those large boxy speakers that have an overpowering presence in your garden, but there is no reason for you to be deprived of the music they delivered. So we have created our Soundstone series to preserve the natural surroundings you work so hard to maintain.... and still give you the music you deserve.

The Soundstone can be connected to any indoor or professional music system. Models are produced in an array of vibrant colours to blend into the desired setting. It is an ideal outdoor speaker for gardens, terraces, resorts & jogging tracks.

Specifications

Frequency Response:	50 Hz 18Khz
Sensitivity :	89 db/w/m
Power Handling :	40 watts R.M.S.
Impedance	8 OHMS nominal
Drivers	Glass filled polycarbonate basket, 6.5" polypropolene woofer, Polycome 1" tweeter
Weather Handling :	-38°C to 60°C
Operating Relative Humidity :	99%
Body Materials :	Glass reinforced Fiber
Colours :	Lawn Green, Black Stone, Peach Sand Brown
Optional:	100 Volt LMT
