

# SONNETEER:

## WIRELESS AMPLIFIER

Banish your hi-fi racked separates to the attic or even the museum as the Bard amplifier replaces them all and appears invisible(almost!) in your living room.

Small enough to fit in the palm of your hand the Bard Amplifier is has the performance and build quality of a high quality music system, in keeping with the Sonneteer tradition. Just plugs into a pair of decent loudspeakers and receives music sent from your computer or other music players like CD, MP3(iPod for example), radio etc. attached to one of our Bard transmitters.

The Bard amplifier is available in two forms; the 'Rug Rat' and the 'Plug Top'.

The 'Rug Rat', as shown on the previous page, is an amplifier that sits on the floor by your loudspeakers or even behind the sofa and is powered by a mains cable plugged straight into the wall.

The 'Plug Top' version, as shown here is an amplifier, exactly the same size and function as the 'Rug Rat', just in this case it plugs directly into the wall socket like a mains adaptor.

For turning your computer into a high quality juke box with a BardUSB, for use as second room system, or even as a rear channel amplifier combined with a Bardtransmitter the Bard amplifier stretches teh possibilities of a high quality music system in teh home.
